

# MOBILE BOX

## Connects to a vehicle's 12-volt socket for the ultimate plug-and-go solution

**Watergen Green Solution provides up to 10 liters daily of fresh drinking water from air while on the go.**

Mobility and convenience are core features of Watergen's Automotive Box, which weighs less than 15 kg, is just 40/40/50 CM physical size, and is fitted with wheels. It provides a supply of **up to 10 liters of great-tasting, off-the-grid drinking water a day**, produced from the air, and right to your point of use. The produced water is premium drinking water, thanks to an internal filtration system that was specially designed for the device's unique size.

The Mobile Box produces instant, tasty water for long car journeys, for truck drivers who are on the road for many hours, for camping purposes, for RV water needs, weekend road trips, and even for personal use at home. The system continuously creates fresh water on the go,

so that you can stay hydrated without ever running out. No more lugging dozens of plastic, eco-unfriendly bottles of mineral water on your trips.

The Mobile box can be stored in the a vehicle, removed easily, and transported wherever needed. An alternative is to simply remove the internal water tank and carry it to a desired location.

Watergen has created a world-first water production device that can be connected to the 12-volts socket found in cars and jeeps. The device's sleek design and quiet operations function, combined with the fact that it works off the vehicle's battery, brings users a clean, green, and highly convenient water-dispenser solution.

## MOBILE BOX Advantages

**Fresh and safe drinking water from air**

**Up to 10 liters of drinking water each day**

**Off-the-grid solution, no plumbing needed**

**Simple and easy to transport**

**Sustainable solution, reduces plastic waste and carbon footprint**

**Removable internal water tank**

**Water production is at the point of use**

**Complies with international water purifications standards**

## Specifications

<b>Water generation capacity</b>	Up to 10 liters/2.6 gallons a day
<b>Water dispensing</b>	Ambient
<b>Dimensions (LxWxH)</b>	50cm x 40cm x 40cm/19.6" x 15.75" x 15.75"
<b>Weight</b>	10kg/22 pounds (dry)
<b>Power</b>	12V
<b>Power consumption</b>	480W
<b>Air filtration</b>	Multi-media air filtration cascade
<b>Water purification technology</b>	Removing heavy metals, particles filtration, biological treatment, organic compounds (VOC, SVOC) and mineralization by cutting edge technologies
<b>Noise level</b>	≤ 52dBA

## Applications

Construction sites

Camping overland

### About Watergen

Watergen has devoted its innovative technology towards solving the world's water crisis under the leadership of its president, Dr. Michael Mirilashvili. Watergen provides a game-changing water from air solution based on its proprietary patented GENius technology that uses humidity in the air to create clean and fresh drinking water for people everywhere. The company offers a range of Atmospheric Water Generators (AWG) for various applications; the home-office scale GENNY that can produce up to 22 liters of drinking water per day, the medium-scale GEN-M that produces up to 800 liters of drinking water per day and the industrial, large-scale generators that can make as many as 6,000 liters of drinking water per day. Watergen's AWGs are installed in more than 60 countries around the world.
